

Release Plan

HotelLocal

Release Date: December 2018

High Level Goals:

- To be able to create a search option for a location (Santa Cruz to start).
- To be able to suggest family owned hotels within the searched area.
- To be able to give information about selected hotel and have a link to their website.
- To be able to create a platform to rate and review each hotel.
- To be able to sort and filter hotels suggestions by rating or price.
- To be able to give directions to the hotel using a platform like Google Maps.

User Stories:

Sprint 1: Functioning website

User Story 1: As a user, I need to search for hotels based on location so that I can plan my stay.

User Story 2: As a user, I want to find a list of smaller hotels in the area to avoid picking between the same 5 or 6 companies.

Sprint 2: Expand on details of the hotels displayed to our customers

User Story 1: As a developer, I want to create a local hotel database.

User Story 2: As a developer, I want to create a search and sort algorithm prominently displaying local/family owned hotels.

User Story 3: As a developer, I want a detailed, more interactive website.

Sprint 3: Clean up design and add more features

User Story 1: As a user, I want to be able to search for a hotel based on location.

User Story 2: As a user, I want to filter and sort the hotels by different options.

User Story 3: As a user, I want to be able to view a clean website with clear layout.

Sprint 4: Clean up design and combine components

User Story 1: As a user, I want to visit a clean, organized website, so that I can find all the information I need in a readable format.

User Story 2: As a user, I want to be able to sort/filter my hotel results through a variety of options, so that I may find my best pick.

Product Backlog:

- To be able to suggest local restaurants and attractions in the area.
- To be able to book the hotel straight from the website.
- Be able to login and review your search history.
