

Sprint 1 Report

HotelLocal

10/21/18

- Actions to stop doing
 - For this first sprint, we have been arbitrarily assigning tasks. As such, the distribution of work has become fairly unbalanced.
- Actions to start doing
 - Because we have other classes that also have a lot of work, we need to designate more time to working on this project.
 - Start using version control on github so we can all access the website and the database.
- Actions to keep doing
 - We should continue to facilitate our meetings as we have been. These have shown to promote productivity.
- Work completed/not completed
 - We have completed a basic outline of the website with a logo and buttons.
 - We have a more solid idea of the technologies we need to use. That being said, any additional issues would be handled on our own time rather than the Sprint.
 - Learning the details in making a website, (i.e. hosting, where to use the front-end framework as opposed to back-end, implementing the database, etc.) is still a work in progress. Like the point above, though, that will be on our personal time.

- Work completion rate
 - 2 out of the 3 user stories were completed in 22 estimated work hours in 12 days.

We are estimating 1.5 hrs/day and 1 task/day.

Final Burnup Chart
