Sprint 3 Plan

HotelLocal

Completion Date: 11/18/18

Goal:

User Story 1: As a user, I want to be able to search for a hotel based on location. (6)

    Task 1: Have a functioning algorithm that searches based on entered location string

    Task 2: Attach the algorithm to the website.

    Task 3: Have return of hotels based on location chosen.

User Story 2: As a user, I want to filter and sort the hotels by different options.(4)

    Task 1: Have options by which hotels can be filtered

    Task 2: Creating buttons search hotels depending on the filter options.

    Task 3: Revise the algorithm to include these filtering options

    Task 4: Have a menu that displays options by which hotels can be filtered.

User Story 3: As as user, I want to be able to view a clean website with clear layout. (2)

    Task 1: Make a design of each page on the website.

    Task 2: Get hotels displaying in correct locations.

    Task 3: Have fully functioning pages for each button.

    Task 4: Navigation between each page.
